

LEDAT19CL-8W-DD / 30K

TECHNICAL SPECIFICATIONS

- 8 WATTS
- 120 VOLTS
- 800 LUMENS
- Degrees Kelvin: 3000K
- CRI: 80
- Bulb color: Clear
- **This bulb turns on and off with daylight**

DIMENSIONS

LUMINOUS INTENSITY DISTRIBUTION DIAGRAM

AVERAGE BEAM ANGLE (50%): 282.3°

Unit: CD — C0/180,248.8° — C90/270,315.7°

FIGURE AAI

Note: The curves indicate the illuminated area and the average illumination when the luminaire is at different distance.

While our LED bulbs function with most dimmers and dimmers generally have a maximum 150-Watt rating for LED bulbs, we strongly recommend that you not exceed 80% of this capacity in order to avoid lighting flicker when the dimmer is at its lowest setting. For example, we recommend a maximum of 15 8-Watt PAR20 bulbs (total 120 Watts).
