T8 TYPE B

DESCRIPTION

RENO Lighting's newest addition to the T8 line consists of industry-leading innovation at your fingertips! This T8 Ballast Bypass Tube now has integrated Multi CCT and Wattage technology, coupled with a wide voltage range of 120-347V.

FEATURES

- Built-in safety switch prevents electrical shock during installation
- Operates directly on 120-277V & 347V line voltage simple ballast bypass
- Compatible with shunted and non-shunted lamp holders
- Rated for use in fully enclosed fixtures.
- Suitable for use in dry and damp locations
- Multi CCT & Wattage
- Single and Double ended*
- NSF Listed: NSF/ANSI Standard 2 - Food Equipment
- Operating Temperature: -4°F to 113°F (-20°C to 45°C)
- Reno LED T8 lamps conform to UL 1598 Standard
- 7 year warranty

* For new retrofit projects, double-ended wiring is recommended.

APPLICATIONS

-  Commercial building
-  Food Service Equipment
-  Residential

MULTI SWITCHES

DIMENSIONS

PROTECTION FEATURES

INTERNAL SAFETY SWITCH

Internal Safety Switch for installation protection.
(No current will flow until pins on both ends are engaged)

MISUSE PROTECTED FUNCTION

Misuse - Protected function if forgot to by-pass the ballast, the lamp won't work, no risk of fire or cap melting.

DOUBLE-ENDED WIRING DIAGRAM

1. Cut all existing connections to ballast as shown below and remove ballast.
See Figure A above for typical ballast configurations.
2. Re-wire fixture as shown below. For Double-ended wiring, use either shunted or nonshunted lampholders.

Note: There should not be any exposed wires at the end of installation.

Shunted Lampholders

Nonshunted Lampholders
